<https://github.com/Midrax> |
(+44)7367524452

Profile

Male | Date of birth: 06/09/1995 | Nationality: Italian w/ Settled Status

LinkedIn: <https://www.linkedin.com/in/ridam-rahman-405b4b155/>

Technical Skills

- Programming Languages:
 - C++ (5+ years)
 - C# (5+ years)
 - Java (3+ years)
 - Python (2+ years)
 - Scala (1 year)
 - JavaScript (4+ years)
 - Typescript (4+ years)
- Known Libraries/Frameworks:
 - DirectX
 - AngelScript
 - Gameface
 - SFML
 - Angular
 - Ionic
 - JQuery
 - Bootstrap
 - Struts2
- Game Engines
 - Unity (5+ years)
 - Unreal Engine (5+ years)
- Operative Systems
 - Windows
 - Linux
 - OS X
- Agile UX Design
- Software Engineering
- Software
 - Git
 - Photoshop
 - Anaconda
 - Office Suite

Relevant Experience in Game Development

Professional Games

“RimWorld: Console Edition”

(Ludeon, Double Eleven, 29 June 2022)

Programmer, 2 years

Link: <https://rimworld.double11.com/>

[Responsibilities]

Re-adapting the PC-derived user experience into something that fit the expectations people have for gameplay on consoles, and optimizing the performance on lower-end machines. Such tasks included re-implementing UI through cross-language frameworks such as Gameface by Coherent Labs. I've also implemented a translation management system to keep our repositories up to date using data from thirteen separate language repositories.

“Fallout 76”

(Bethesda Game Studios, Double Eleven, September 2023)

Programmer, 2 years

Link:
<https://fallout.bethesda.net/en>

[Responsibilities]

Tweaking BGS' proprietary engine, Creation Kit, to support the needs of different disciplines across the project. Such changes involved fixing the mesh exporting tool, to allow people to get a fully 3D textured model out of the engine with all relevant data embedded inside the exported content, such as textures, materials, and mesh data.

Unannounced Project (REDACTED, Double Eleven, TBA 20XX) Programmer, 3 years	[Responsibilities] Using Unreal's state-of-the-art technology such as State Trees, GAS and EQS to implement gameplay logic according to the requirements set by designers for an ARPG in a multiplayer networked environment. Ulterior tasks included writing Data Table management systems and automated tests.
--	---

Academic Projects

“Onirico” (DES502 – Game Design and Development) Lead Programmer/Designer 3 months	[Responsibilities] Partial design and full implementation of all gameplay mechanics using Unity, including: camera movement, player movement, enemy movement, stealth system, and UI elements.
“Procedural Scene” (CMP505 – Advanced Procedural Methods) Developer 1 month	[Responsibilities] Implementation of a 3D scene using DirectX 11, featuring a procedurally generated terrain with random noise, simplex noise, faulting, smoothening, dungeons generated through Voronoi regions, collision detection and post processing.
“Roll-A-Ball-AI” (MAT501 – Applied Mathematics and Artificial Intelligence) Developer 1 months	[Responsibilities] Implementation and comparison between two AI in Unity, built respectively using a rule-based system with a Finite State Machine, and an ML Agent with Reinforcement Learning,
“SFML Hockey” (CMP501 – Network Game Development) Developer 2 weeks	[Responsibilities] Implementation of a client-server infrastructure for a 2-player game similar to Pong, using the Super-Fast Multimedia Library.

Game Jams

“Solomon’s Lost and Found” (Global Game Jam 2021) Game Designer, Programmer 3 days Link: https://v3.globalgamejam.org/2021/games/solomons-lost-found-9	[Responsibilities] Design and implementation of a “Papers, Please!” inspired clone.
---	--

“Garden of Memories” (GameJobsLive Game Jam 2020) Game Designer, Artist, Storywriter, Programmer 7 days Link: https://midrax.itch.io/garden-of-memories		[Responsibilities] Design of gameplay features, puzzles, storyboard and game art.
“Eliptica” (AltControl Game Jam 2020) AI Programmer 7 days Link: https://github.com/Midrax/AltControlGameJam2020		[Responsibilities] Design and implementation of enemy movement and attack in Unity.
“Sparky & Smith: Under Repair” (Global Game Jam 2020) Developer, AirConsole/Controls Specialist 3 days Link: https://github.com/Midrax/GGJ2020		[Responsibilities] Implementation of controls through AirConsole, within Unity
“Revolution” (AGDS Game Jam 2020) Programmer 3 days Link: https://github.com/Midrax/Revolution-GameJam		[Responsibilities] Partial implementation of obstacles and gameplay mechanics within Unity

Education

Abertay University 2019-2020	
Computer Games Technology Relevant Modules:	Master of Science Applied Mathematics and Artificial Intelligence, Game Design and Development, Advanced Procedural Methods, Programming for Games, Network Game Development
Thesis:	“Using Generative Adversarial Networks for Content Generation in Games”
Sapienza University 2015-2018	
Computer Science Relevant Modules:	Bachelor of Science Fundamentals of Programming, Logic for Computer Science, Digital Electronics, Algorithms, Differential Calculus, Computer Architecture, Programming Paradigms, Operative Systems, Data Bases, Algebra, Computer Networks, Parallel and Functional Programming, Human Machine Interaction, Software Engineering, Automata, Complexity and Calculability
Thesis:	"QuBE - The Quiz Battle Editor: An environment for educational game development"

Employment

Full Stack Developer

PC-Cube

April 2018 — July 2019

I've developed progressive web applications using Angular and Ionic for public administration. I've also worked as a system administrator alongside IBM at the Ministry of Justice in Italy.

Game Programmer

Double Eleven

April 4 2021 — Today

I've worked as a professional game programmer for five years, working on different elements that span across console porting, tooling, performance optimization, gameplay logic implementation, PCG, and doing the karaoke at the company's summer and winter party.

Hobbies and Interests

I like narrative entertainment and good music. I try to keep up to date with popular culture in any form, from standard literature and comic books to TV shows, anime, movies and, obviously, video games. In my spare time I enjoy writing novels, performing in stage productions, DJ-ing, sketching on my notebook, or composing music on my piano. I have published two short novels in Italian.
